

ATHARVA YOGESH SHIMPI

FULL STACK WEB DEVELOPER

Mumbai, Maharashtra | atharvashimpi8@gmail.com | +91 9594601353 | atharvashimpi.vercel.app

PROFILE

Third-year Computer Engineering student who builds things end to end — React frontends, Node APIs, databases, and everything in between. Shipped multiple MERN stack projects from scratch over the past year, alongside Java with Spring Boot and Python with Flask. Writes clean, readable code, learns fast, and does the best work when the problem is real. Open to internship, full-time, and freelance opportunities to build production-ready solutions.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, Python, C, HTML5, CSS3

Frontend: React.js, Vite, Tailwind CSS, Bootstrap, Context API, Hooks

Backend: Node.js, Express.js, Spring Boot, Flask, REST APIs

Database: MongoDB, MySQL, Firebase Firestore

Tools: Git, GitHub, Postman, VS Code, Socket.io, JWT, Maven, Cloudinary

PROJECTS

ChatterBox — Real-Time Chat Application

MERN Stack · Socket.io · JWT

- Built a live messaging platform with room-based chat, real-time user presence, and instant delivery without page refresh.
- Architected the Node and Express backend with Socket.io for join, disconnect, and broadcast events across rooms.
- Stored conversation history in MongoDB with a responsive React UI built for both desktop and mobile.

AuthFlow — User Authentication System

MERN Stack · Firebase Auth · JWT · bcrypt

- Built a complete auth system covering registration, login, logout, and password change using JWT and bcrypt.
- Protected routes with React Context and Firebase's session listener to keep users signed in across page reloads.
- Included email-based password reset and clean form UI with real-time validation and error feedback.

TaskWave — Task Management Dashboard

MERN Stack · REST API · Context API

- Full-stack task manager with CRUD operations, priority levels, due dates, and category filters synced to MongoDB.
- Secured all API routes using JWT middleware and handled global UI state with React Context API.
- Focused on user experience with status toggles, clean card layout, and a responsive two-column dashboard.

Virtual Banking System

Java · Spring Boot · MySQL · REST API · Maven

- Banking backend with account creation, balance enquiry, deposits, withdrawals, and fund transfer between accounts.
- Followed layered Spring Boot architecture with Controller, Service, and Repository layers and proper transaction handling.
- Managed relational data in MySQL with foreign key constraints to keep account operations consistent and reliable.

NeighbourHub — Real-Time Community Notice Board

MERN Stack (React/Vite/Tailwind) · Socket.io · MongoDB Atlas · Gemini AI · Cloudinary

- Built a structured, moderated alternative to WhatsApp groups for neighborhood coordination, with real-time updates via Socket.io and JWT auth secured by email OTP verification.
- Integrated Gemini AI for automatic post categorization with a model fallback chain, plus HuggingFace-based toxic content filtering and Google Translate support.
- Hardened the backend with env-based CORS, health checks, centralized error handling, graceful shutdown, and automated cleanup via node-cron; added Cloudinary image uploads with auto-delete.

Personal Portfolio Website

React · GSAP · react-router-dom · Web3Forms · atharvashimpi.vercel.app

- Designed and deployed a personal portfolio with scroll-driven GSAP ScrollTrigger animations and a bold, minimal dark aesthetic.
- Integrated Web3Forms for serverless contact form submissions with a dedicated confirmation flow via react-router-dom.

EDUCATION

B.E. in Computer Engineering

2024 – 2028

Don Bosco College of Technology, Mumbai | Third Year | Avg. 8.5

Senior Secondary — HSC (Science)

2022 – 2024

Mumbai, Maharashtra

CERTIFICATIONS

- MERN Stack Development — Success Classes of Engineering
- Java Programming — Success Classes of Engineering

STRENGTHS

Fast Learner · Problem Solver · Team Player · Detail-Oriented · Self-Driven · Adaptable
